

### Is Your Organization As Protected As You Think?

As a key part of our ongoing efforts to deliver exceptional client service and forward-thinking guidance we offer complimentary Insurance Review Services; a leading edge review service unmatched by other law firms in the market.

Data privacy and cybersecurity incidents continue to be disruptive, potentially catastrophic expense events impacting an organization's bottom line. Often, our clients contact us after an incident has occurred, only allowing us to evaluate their current coverage, and potentially uncovering previously unidentified lapses that leave them exposed. In our experience, two scenarios typically play out in these circumstances:

- 1 Clients are without cyber insurance coverage in place, and as a result, need us to help them navigate other available insurance risk transfer options; or
- 2 Requesting our intervention with their insurance carrier to ensure that Dykema remains their trusted counsel and avoids their matter being handled by a discounted panel law firm the carrier selects.

We routinely assist clients with these requests, often identifying the need for other critical business and liability coverages that were missing from their insurance portfolios. However, with our review services, we proactively address your business operations to ensure you have the coverage and protection your business needs.

Bringing our combined 25+ years of insurance industry expertise, we coordinate with top industry brokers, regularly placing cyber and other lines of insurance coverage to clients' existing insurance policy limits, terms, and pricing. We also help identify where coverage improvements and premium savings can be realized.

This complimentary insurance review service also includes broker-facilitated audits of specific cyber insurance (and other) policies as requested, as well as benchmarking (pricing) and exposure analyses for Dykema clients.

Please contact our team to schedule a discussion of our complimentary service offering.
