Overview

Periodic reviews and assessments of an entity's IP protection are crucial to continuing corporate growth. Brands and companies can be fatally weakened by failing to register new products or services or properly maintaining existing IP rights.

Dykema gives clients the practical advice and individualized solutions they need to develop, exploit and protect portfolios of IP assets. We regularly audit and evaluate clients' IP portfolios, providing strategic advice on how to strengthen them or make them more cost-effective. Our seasoned attorneys perform intellectual property due diligence on:

- Corporate mergers and acquisitions
- Investigations on trade secret portfolios
- Investigations on IP licensing portfolios
- Trademark, patent and copyright portfolios
- Investigations on web-based IP portfolios
