Cooney-Led Defense Verdict Featured in *The Voice*

And the Defense Wins

February 15, 2012

Leader of Dykema's Automotive and Product Liability Practice Group, Mike Cooney, recently prevailed in a product liability case on behalf of Dykema client, Key Safety Systems, Inc. (KSS). Coverage of the verdict was featured in DRI's *The Voice*. In the matter, the plaintiff sustained injuries resulting from an automobile accident in which the plaintiff rode as the front passenger of a Ford Explorer. Plaintiff alleged that defects in the front passenger airbag sensors caused late deployment of the airbag.

After a two-week trial, on December 9, 2011 a Bergen County, New Jersey jury found in favor of KSS, and that the plaintiff's injuries resulting from the accident were not the result of a KSS product performance issue.
