“How does autonomous vehicle technology impact automaker liability?”

September 12, 2019

Automotive World

Michael R. Carey, Minneapolis-based member in Dykema’s Products, Class Actions & Professional Liability Practice Group, authored the article, “How does autonomous vehicle technology impact automaker liability?”, which was published in *Automotive World*.

The article examines whether or not manufacturers will be liable for every autonomous vehicle crash injury. Carey points out that the time-tested strict products liability model is well-suited for the future of mobility, particularly as it relates to personal injury litigation.
